BLUEMED – A Basin of Research and Innovation for Sustainable Growth

18 - 19 April, 2017
The Victoria Hotel, Sliema, Malta

The BLUEMED Research and Innovation initiative for blue jobs and growth in the Mediterranean Area is firmly on the Agendas of the European countries bordering the Mediterranean Sea. It offers a shared strategic framework for working towards a healthy, productive and resilient Mediterranean Sea that is better known and valued. It is designed to tap the full potential of the marine and maritime sectors, structuring transnational cooperation to boost the Blue Economy, and promote and improve social wellbeing, sustainable prosperity and the environmental status of the region and its surroundings.

Organized under the auspices of the Maltese Presidency of the Council of the European Union, the event *'BLUEMED - A Basin of Research and Innovation for Sustainable Growth'* aims to open up this initiative, for the first time, to non-EU Mediterranean Partner Countries. The goal is to initiate regional cooperation within the Mediterranean by pooling all efforts together to unlock the potential for Blue Growth and job creation at local, regional and international level.

Research and Innovation is a key driver of this process. Its potential will be disclosed through showcase of relevant projects and discussions on how to connect the Mediterranean and collaborate on innovative activities along the value chain.

18th April, 2017 – Day 1**13:30 – 14:00 Registration & Welcome Coffee****14:00 – 14:30 Introduction and Opening Session**
