

The 24th **International Scanning Probe Microscopy (ISPM 2026)** will take place in Genoa, Italy, from **May 26-29**. Since its start in Seattle in 1999, the series has highlighted research on scanning probe microscopy (SPM), sensors, and nanostructures. This year, ISPM will again join **SPMonSPM**, dedicated to the latest advances in SPM applied to molecular systems, (bio)polymer science, and soft matter.

Recent advancements and breakthrough methods in AFM, STM, and SNOM will be presented. This year, a special session will be dedicated to correlative microscopy. The second day of the conference will focus on soft matter, biological materials, and applications in biology and biomedicine, continuing the tradition of SPM on SPM.

Program:

- Tuesday, May 26th, from 11.00 am: Welcome. Keynote presentation. Talks and Poster sessions.
- Wednesday, May 27th: Talks and Poster sessions. Conference dinner.
- Thursday, May 28th: Talks and Poster sessions.
- Friday, May 29th, until 3.00 pm: Talks and Poster sessions. Concluding remarks and farewell.

A full list of sessions will be communicated soon.

Important dates:

- Abstract submission deadline: January 31st, 2026
- Contributions acceptance, draft program on the web: February 28th, 2026
- Early registration deadline: March 15th, 2026
