

Consiglio Nazionale
delle Ricerche

12th November 2018 - h. 10.30

c/o CNR (National Research Council of Italy) – Piazza Aldo Moro 7 - ROME

We are glad to invite you at the workshop

“On the method for the stabilization and inertization of slag deriving from steel production processes in steelworks and blast furnaces”

The workshop is based on the FMP Srl – innovative startup – patent developed thanks to the scientific support of three CNR Institutes (Igag, Irsa e Ism) and the advisory of Consulfin.

TIME	TITLE	SPEAKER
10.30	<i>Welcome / Intro</i>	Dott. Antonello Provenzale- (Acting Director of Dept. Earth system science and environmental technologies)
10.45	<i>Welcome</i>	Eng. Franco Scolari – Director of the <i>Polo Tecnologico of Pordenone</i>
10.50	<i>Hystory of Structural Engineering</i>	Prof. Tullia Iori –Università Roma Tor Vergata
11.15	<i>Qualification of concrete made with recycled materials</i>	Ing. Ilaria Capasso – Ricercatore ITC - CNR
11.45	<i>Stabilization of steelmaking slag based on FMP patent and possible application in concrete production</i>	Dr. Girolamo Belardi - IGAG CNR
12.30	<i>Discussion</i>	Chairman : Dr. Paolo Messina
13.00	<i>Business brunch</i>	

Special thanks to Acciaierie Beltrame for providing the slags and for the laboratory tests

Special thanks to Boer Group Srl for the slag stabilization and artefacts production

Please confirm sending an email to gestionctr@consulfin.biz including number and name of participants
