VERONA, 15-19 JUNE

## ITALY, A STORY MADE OF DIFFERENT STORIES

Being the second industrial power in Europe, ECDNT2026

will be hosted in Italy, where NDT is extensively required in multiple sectors:

- + Italy is a place where Italian artisans use age-old techniques, working gently to create magical artefacts like blown-glass, hand-chiseled violins, art of painting and ceramics.
- + Italy is also a place where breathtaking skylines leave you in awe at architecture that combines passion with beauty and form with functionality.
- + Verona, the host city, is a world leader in so many fields: from artistic excellence and contemporary cuisine, including one of the biggest tradeshow in food and wine, to state-of-the-art engineering and sustainable architecture.

# WHY ITALY AND WHY VERONA?

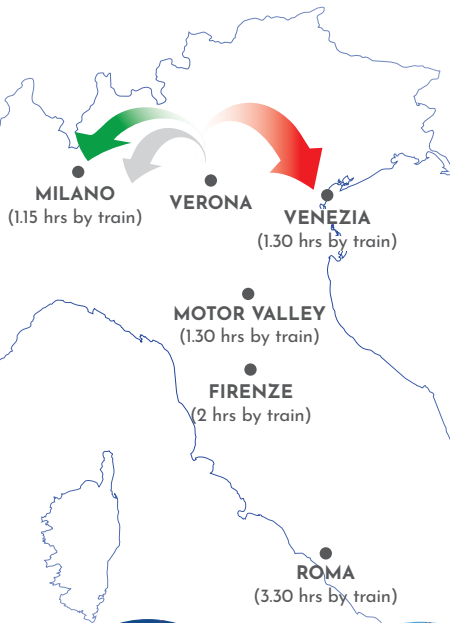

VERONA, A UNIQUE HERITAGE CITY  
IN AN EXCELLENT LOCATION

A highly **livable, culturally dynamic, welcoming city**.

**Strategic position** near Lake Garda and the Dolomiti mountains, **easily reachable from other important industrial and artistic Italian cities** such as Milan, Venice, Brescia and Bologna.

With its **airport, railways and road networks**, it is an important transport hub in Northern Italy.

Organizing an event in Verona means **increasing the number of participants** compared to the same event hosted else where.

BY CAR

**North-south A22**  
"del Brennero" highway

**East-west A4**  
"Serenissima" highway

BY TRAIN

**Verona Porta Nuova**  
the main railway station,  
with frequent trains  
departing every hour,  
connecting Verona with all  
the important Italian cities  
and railway stations

BY PLANE

**Airport**  
**Verona Valerio Catullo**  
located 10km southwest  
from the city center and  
connected to the city by  
the western ringroad
