

52nd Meeting of the Italian Crystallographic Association

8-11 September 2026, Bari

Microsymposia

- MS1 *Perspectives of crystallographic methods and techniques*
- MS2 *Advances in crystal engineering*
- MS3 *High-throughput and dynamic studies on biosystems*
- MS4 *From ambient to non-ambient conditions: exploring mineral structures and transformations*
- MS5 *New frontiers in X-ray sources for materials science*
- MS6 *Crystal growth, from fundamentals to applications*
- MS7 *The role of applied mineralogy in bridging resources, materials, environment and health*
- MS8 *Protein structures for modeling, function and drug design*
- MS9 *Advanced materials for sustainable energy*
- MS10 *Sharing and disseminating crystallography*
