

# A Unique European Distributed Research Infrastructure for Industrial Biotechnology

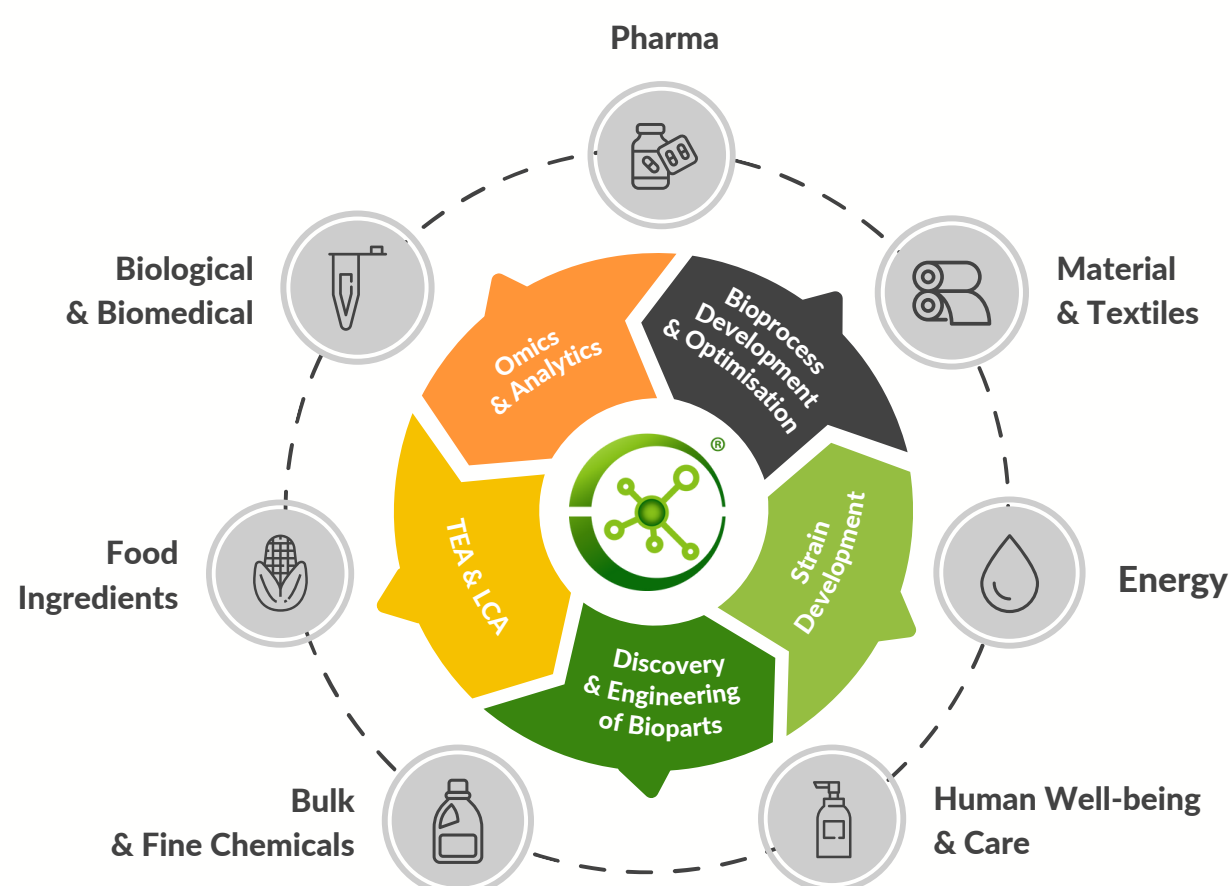

Public Institutions from **9 EU Member States** (France, Italy, Spain, Finland, Belgium Netherlands, Germany, Greece, Ireland) and the **UK**

## Vision

Industrial Biotechnology providing building bricks for advanced, highly-digitalised biomanufacturing solutions and bio-based services

## Mission

Providing access to advanced research and innovation services, enabling the development of biotechnology as a cornerstone of the circular bioeconomy

## IBISBA's Services

IBISBA services are relevant to a wide array of market sectors covered by biotechnology.

**23**  
PARTNERS

**19**  
FACILITIES

**33**  
SERVICES

## IBISBA-IT

The First Italian Research Infrastructure for Industrial Biotechnology

## A Specific Mission

Developing new molecules and processes through enzyme/protein discovery, especially from extremophiles, and new biotransformations and bioprocesses

IBISBA has received funding from the EU's H2020 research and innovation programme (grant agreements No 730976 and 871118).
