

# Take a look inside our highlights!

Springer offers a free preview for all available titles: series, books, journals

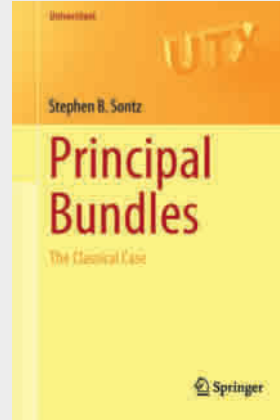

**Arnold Mathematical Journal**  
 Editor-in-Chief: Askold Khovanskii  
 Managing Editor: Vladlen Timorin

This new journal presents interdisciplinary results in mathematics

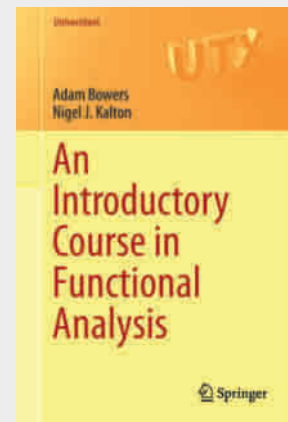

**Principal Bundles**  
 By Stephen Bruce Sontz

Presents important, modern geometric ideas in a form accessible to students and researchers in other areas

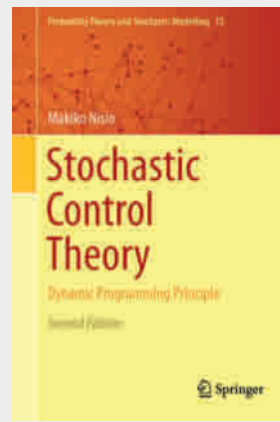

**An Introductory Course in Functional Analysis**  
 By Adam Bowers and Nigel J. Kalton

Presents the basics of functional analysis according to Nigel Kalton, a leader in the field

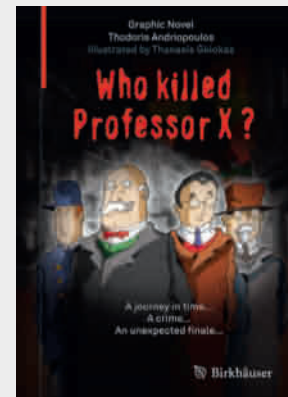

**Stochastic Control Theory**  
 By Makiko Nisio

Deals with a quick review of stochastic analysis and stochastic differential equations with random coefficients

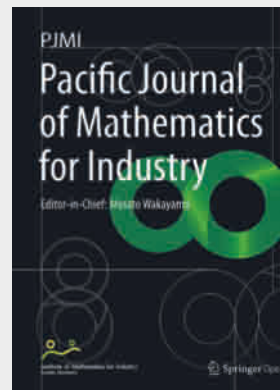

**Who Killed Professor X?**  
 By Thodoris Andriopoulos

This graphic novel is both a historical novel as well as an entertaining way of using mathematics to solve a crime

**Pacific Journal of Mathematics for Industry**  
 Editor-in-Chief: Masato Wakayama

Fully funded SpringerOpen journal, so authors don't pay the APC

Let your book benefit from being part of the largest eBook Collection in Mathematics. Send your book proposal to our Publishing Editors. Visit [goo.gl/6cr9RK](http://goo.gl/6cr9RK).
