Department of Statistical Sciences

University of Bologna

B.Sc. in Statistical Sciences 2011-2015

Department of Statistical Sciences

University of Bologna

Research Interests

Social dilemmas, Social norms, Experiments, Agent-based modelling

Dissertation Project

My Ph.D dissertation project is about tax compliance in Italy. The main objective is to explain the tax compliance gap between North and South of Italy by focusing on three potential mechanisms, institutional, individual, and social, and putting them against each other to see which accounts best for the observed gap. Methodologically, the whole project consists in a vignette study, an online experiment (programmed in oTree) and an agent-based model.

Teaching and Research Experiences

Teaching Assistant

Course: Sociology (prof. Squazzoni), Degree programme in Political Sciences

University of Milan

Research Assistant

Prof. Chiara Daniela Prenzato, University of Turin

Conferences and Seminar Presentations

Paper presentation at Annual Conference of Experimental Sociology
Ascona, September 2021

Poster presentation at Joint Interdisciplinary Graduate Conference
Tilburg, June 2021

Selected Courses and Summer Schools
