

## **Maria Grazia Betti**

Maria Grazia Betti is Full Professor in Physics at the University of Rome La Sapienza, where she is responsible of the surface and nano-science laboratory. Her experimental activity is in condensed matter physics, particularly in the electronic and magnetic properties of nanoscale structures. She has served in several scientific review panels of national and international research institutions, among these, she was scientific member and Italian representative in the Scientific Advisory Committee (SAC) of the European Synchrotron Radiation Facility (ESRF) Grenoble for two terms (2012-2017), and for eight years in the Proposal Review Committee of the National French Synchrotron Radiation Facility SOLEIL (France) and now at the Italian National Synchrotron facility at Elettra (Trieste).

She has held several academic appointments at the University La Sapienza and she is member of the College Board of PhD School in Physics and she served in the Senato Accademico (2013-2016). She has a Laurea degree in Physics from the University of Rome La Sapienza in 1985 and a PhD in Physics from the University of Parma-Modena in 1988.
