Research evaluation: the new guidelines for Public Research Bodies not supervised by the MIUR

The **ANVUR** - National Agency for the Evaluation of the University and Research Systems, in agreement with the **ConPER**- Council of Presidents of Public Research Bodies, has published the new **guidelines** for the evaluation of Public Research

Bodies (EPRs).

The new guidelines were designed exclusively for EPRs **not supervised by the MIUR**- Ministry of Education, University and Research:

- Council for Agricultural Research and Agricultural Economy Analysis - **CREA**
- National Agency for New Technologies, Energy and Sustainable Economic Development - **ENEA**
- National Institute for Public Policies Analysis - **INAPP** (formerly **ISFOL**)
- National Institute for Statistics - **ISTAT**
- National Health Institute - **ISS**
- Institute for Environmental Protection and Research - **ISPRA**
- National Institute for Insurance against Accidents at Work - **INAIL**
- National Agency for Active Labour Policies - **ANPAL**.

Developed and approved by ANVUR in agreement with ConPER, the guidelines are aimed, in particular, at **evaluating** the quality of processes, results and products of **research activities** and activities for the **dissemination** and **enhancement** of scientific results. For INAIL and ANPAL, the guidelines apply only to staff and the research activities of the two organizations.

Directorate General

Actions

The measure implements Decree 218/2016, aimed at **simplifying** the activities of public research bodies. *“This is an important step to extend the evaluation to Research Bodies not supervised by the MIUR while taking into consideration the specificities and institutional missions of these Bodies”*, said **Massimo Inguscio**, President of the ConPER and the **CNR-National** Research Council.
