

Alejandro Manjavacas received his M.S. and Ph.D. degrees from Universidad Complutense de Madrid in 2009 and 2013, respectively, under the supervision of Prof. García de Abajo. Following his Ph.D., he joined Rice University (USA) in 2013 as the J. Evans Attwell Welch Postdoctoral Fellow in the group of Prof. Peter Nordlander. In 2015, he began a tenure-track position as Assistant Professor at the University of New Mexico (USA), where he was later promoted to Associate Professor with tenure. In 2020, he became a Tenured Scientist at the Institute of Optics of the Spanish National Research Council and was subsequently promoted to Senior Scientist at the Institute of Chemical Physics. Dr. Manjavacas has received several distinctions, including the RSEF–BBVA Foundation Award for Best Young Theoretical Physicist in Spain, the U.S. NSF CAREER Award, the BBVA Foundation Leonardo Grant, and the Miguel Catalán Award for Best Scientist in Madrid under 40. His research focuses on the fundamental aspects of light–matter interaction at the nanoscale. He has co-authored over 90 publications, accumulating more than 8,000 citations and an h-index of 39 (Google Scholar).
