Brief profile

After a degree in Computer Science at the University of Milan, I obtained a PhD from the University of Maastricht (NL). I work as epidemiologist and public health researcher in Mario Negri Institute, Milan, since 1997, where I lead the Laboratory of Lifestyle Research since 2017. During my 28-year career, I gained extensive experience in conducting independent research and national and international collaborative projects -including in particular 7 projects funded by the European Commission- in the field of epidemiology and public health. My main fields of interest include the epidemiology of tobacco use and other major risk factors in Italy and Europe, the role of novel (tobacco) products on public health, the role of tobacco on COVID-19 and the epidemiology of tinnitus. I am author/co-author of more than 535 articles, including more than 470 papers in peer-reviewed journals (h-index: 82 according to Scopus; 104 according to Google Scholar). In 2017-2021 I have been Honorary Associate Professor at the University of Nottingham, UK. Besides the National Scientific Habilitation as Associate Professor (sector 06/M1; validity 2014-2025), in 2022 I obtained the National Scientific Habilitation as Full Professor from the Italian Ministry of University and Research (sector 06/M1). Since the 2022/2023 academic year, I teach as adjunct professor at the University of Pavia. For scientific merits, I received several awards, including the Ig-Nobel prize for medicine in 2019.
